Other tabs, in no particular order.

Some are tabbed with Power Tab Editor, a free prog. Safe to use, will playback tab.

Some are tabbed with Guitar Pro 5, a prog I now prefer and use for everything including lap steel.

Can change key, show tab or notation, or both, import Power Tab Editor and other formats, set no. of bars

per page, playback tab/notation etc., etc.,

Latest versio of Guitar pro will cost approx, £80.00!!!

Previous version GP5 is now free and legal to download. I have the activation code to install, again free/legal,

it does everything I require and more. Just ask if code required. The ability to read music is an adavantage, but

if not it is a great learning tool. Just having one or both installed on you device will allow you to play the tabs.GP5 in particular,

which will allow you to to edit more than PTE.
