

# Don,t know what to call this

Chord sheet for JA,s mp3 Lo G ukulele 30/6/20

This started off as a ukulele arrangement of the 1957 Chet Atkins guitar solo TRAMBONE.  
His guitar style was mainly, the melody played on the top strings with a walking style bass line on the lower strings in the style of Doc Watson, and Merle Travis.  
So trying to do a ukulele version did,nt work, instead i ended up with this version with bits from the Chet Atkins original and covers by Duane Eddy, The Ventures and The Krew Cats. I used almost the same chord progression for the backing track.  
So, I Don,t know what title to give it. No copywright infringement intended.
